Computer Stationery and Securiform®

We are one of the UK's leading forms printers and are able to produce "in-house" the quality computer stationery and forms that are required in today's competitive business environment.

All standard depths of sizes are easily accommodated and include -

4"	10"
5.1/2"	11"
6" 8"	11.2/3"
8.1/2"	12"

Multiple copies, (available up to **6** parts) are produced using the UK's leading brand of carbonless paper, IDEM®, supplied by Wiggins Teape.

We have the facility to produce 3 ink colours in one pass through our presses and this enables us to print, for example, Terms and Conditions on reverse at the same time. This provides you with significant cost savings.

One of our continuous forms presses

Securiform®

By use of a special tape we are able to over-come problems previously encountered when processing "glued construction" forms. Securiform ensures the documents remain together but it provides enough flexibility to ensure the documents feed through the printer effectively.

Weighbridge Tickets and Securiticket®

Using a weighbridge or weighing equipment?

Contact us now, for all your weighbridge tickets and associated documentation requirements.

Our experience, over 35 years in this field, enables us to provide a first class ticket design, print and supply service. So much so that we are recognised by the main weighbridge and weighing equipment manufacturers as the recommended supplier of tickets to suit their systems.

Securiticket®

Improving the security of the printed weighing documents, Securiticket® provides additional security screen features on the stationery which highlight when it has been altered or defaced.

We provide this service, to all weighing equipment users, at no additional cost.
